STAR CONDUIT PIPES

A PRODUCT FROM  
**star**

STAR electrical Conduit pipes is made of UPVC (Unplasticised polyvinyl chloride) to meet the harsh environments. These conduit pipes are durable pipes and also features power resistance, corrosion free and are thermal resistant. These pipes are easy and fast to install.

Fire is one of the major hazards to life and property, and electrical installations are perhaps one of the primary causes for generation and propagation of fire. Protection of cables and raceways against fire is therefore an important and primary consideration in the design and industry standards. STAR conduit pipes and fittings have good impact strength, superior light proof and chemical resistance. They have high heat deflection temperature and ductile behaviour even at low temperatures.

STAR conduit is available in three different wall thicknesses, with the thin wall variety being suitable for embedded use in concrete and heavier grades suitable for direct burial and exposed work. STAR conduit pipes and fittings resist moisture and most corrosive substances.

STAR conduit pipes are manufactured in accordance with Bureau of Indian Standards specifications IS 9537 : 3 in the range of 2.0 cm to 6.3 cm with light, medium and heavy range. Thicknesses with the thin-wall variety only suitable for embedded use in concrete. Available sizes are 20 mm and 25 mm.

- High Mechanical Strength.
- Fire Resistant
- Easy Wiring
- Durability
- Easy Installation.

STAR electrical conduits are available in **Black & Gray Colors.**

SIZE	DESCRIPTION	CLASS	LIST RATE PER LENGTH
20 mm	ISI	LIGHT	69.00
20 mm	ISI	MEDIUM	81.00
25 mm	ISI	HEAVY	106.00
25 mm	ISI	LIGHT	125.00
25 mm	ISI	MEDIUM	145.00
25 mm	ISI	HEAVY	165.00

The above rate is inclusive of GST 18% Other terms and conditions same.
